Helping To Care

3508 LED Pager

2702 Three Channel Cordless Falls Monitor

Monitor any 3 of these

4024 Wireless Call Buttons with Caregiver Pager

*... helping carers at home*

# HomeCare Range

Easy to use, cordless equipment designed to help keep loved ones, elderly and the frail safe at home for longer, with confidence and peace of mind.

### 3508 LED Pager

Monitor up to 3 cordless devices. Ideal for home care. Auto-reset when paired with a 2719 Pad / Mat Transmitter.

### 2702 Three Channel Cordless Falls Monitor

A new cordless monitor that delivers greater economy and simplicity without sacrificing professional standards.

### 2558 Wireless Call Button with Reset & Pull Cord

Wireless emergency call point with integrated reset button for use with Staff Alert System and the ActiveCare range. Water resistant. Easy installation and simple operation.

### 2721 iBeam

Can be installed adjacent to a bed or across a doorway. Its narrow detection beam and portability makes this one of our most versatile devices.

### 2723 EZYStand

Height adjustable stand for the 2721 iBeam. iBeam is magnetically attached. Allows a caregiver to quickly deploy targeted motion detection alarms in a variety of positions such as next to a bed, in front of a chair, near a door or stairs.

### 4024 Wireless Call Buttons with Caregiver Pager

Kit contains two call buttons and one pager & is ideal for independent living and residential care. Super-simple plug and play setup and operation. Low cost, battery operated (batteries & lanyards included).

### 2719 Cordless Pad Transmitter

For use with cura<sup>1</sup> Cordless Pads & Mats. No more cords between monitor and pads / mats!

### 2629, 2630 & 2624 Cordless Bed & Chair Pads & Mats

Raise an alarm when someone gets off their chair, bed or steps on a mat.

### 2670 PreAlert Cordless Bed Pad

Uniquely different from our other bed pads. It gives an early warning when a patient or resident sits or rolls to the edge of the bed, providing a caregiver more time to prevent a potential fall.

### 2588 Personal Emergency Transmitter (PET)

A low-cost, portable panic button with lanyard and a large rubber button for ease of use.

### 2599 Wireless SOS Call Button

Can be used for homes, hospitals, independent living, commercial premises and other places that need to observe security or emergency precautions. Can be portable or installed in a fixed position.

### 3503 Wireless Door Contact

Detects when a door or window has been opened and sends a wireless signal to a receiver unit. Perfect for anti-wandering systems.

### 3502 Wireless Handset

Patient handset with call & cancel buttons and reassurance LED. Works with nurse call (if used with a compatible cura<sup>1</sup> receiver) or direct to a pager.
